

OUR STORY

INNOVATION IS BORN
OUT OF NECESSITY.

Yvonne Brady is a mum of 3 who ran the Dublin City Marathon in 2010. She looked for sports wear that would correct her posture and take impact off her pelvic muscles - to provide her with just the right feeling of being supported and when her search turned to nothing, as an engineer she knew she could solve this problem herself. Now EVB's are being worn by women all over the world and been recommended by medical professionals worldwide.

**EVB's will keep you youthful.
Build your strength from the inside out.**

Fitting into your EVB's can take a few minutes due to the technology they supply. **DO NOT BE AFRAID TO PULL YOUR EVB'S THEY WILL NOT RIP.**

Please follow our 5 step...

FITS LIKE A GLOVE

FITTING GUIDE

- 1 Scrunch up your EVB's from waist to ankle and put one foot in first, like you would when putting on pantyhose/ tights. Then gradually pull each leg up.

- 2 Pull to above the knee. Tug one leg at a time up your thigh

- 3 Once you have EVB's at the top of your thighs you will need to tug and wriggle to get your EVB's over your bum

- 4 You may need to yank your EVB's over your bum to ensure EVB's sit over your hip bone for that stay up fit.

- 5 Ensure your EVB's are above your naval and the waistband is secure not too tight allowing you to get four fingers into the waistband.
